

## Light mast trailer diesel / battery

|                                               |                                                    |
|-----------------------------------------------|----------------------------------------------------|
| <b>Connection</b>                             | Schuko                                             |
| <b>Drive type</b>                             | Diesel/rechargeable battery                        |
| <b>Installation dimension</b>                 | 2245 x 1714 x 8200 mm                              |
| <b>Illuminated area</b>                       | ca. 3100 m²                                        |
| <b>Operating noise</b>                        | 0 - 58 dB(A) Q 7m                                  |
| <b>Dead weight</b>                            | 1230 kg                                            |
| <b>Handling</b>                               | Wind stability = 110 km/h                          |
| <b>Light duration with one battery charge</b> | approx. 10 hrs / Hybrid approx. 250 hrs            |
| <b>Light duration with one tank of fuel</b>   | mit Generator approx. 140 h                        |
| <b>Illuminant type</b>                        | G4 LED                                             |
| <b>Light output</b>                           | 139.200 lumen                                      |
| <b>Mast height</b>                            | 8.2 m                                              |
| <b>Tank capacity</b>                          | 100 liters (with 110% liquid collection container) |
| <b>Transport size</b>                         | 3390 x 1431 x 2424 mm                              |
| <b>Built-in generator / 230V</b>              | ja                                                 |
| <b>Support load</b>                           | 100 kg                                             |
